

acuitynurse HELPLINE

Cut workers' compensation costs with Acuity Nurse Helpline

What is Acuity Nurse Helpline?

Acuity Nurse Helpline is Acuity's 24/7 nurse triage program that is free to our workers' compensation customers. The program is designed to streamline non-emergent care for your injured workers.

How does Acuity Nurse Helpline benefit me?

This program helps you by making sure your employees receive appropriate care in the unfortunate event of a work injury—which can reduce the insurance costs for your business.

How does having the right care reduce my costs?

Having a registered nurse address your employee's case when it first occurs can help avoid an unneeded trip to the ER or unnecessary costs that can add up. Helpline nurses will quickly assess the situation and give appropriate advice on medical treatment, helping to reduce claim costs while making sure proper medical care is received.

Acuity Nurse Helpline offers you:

- Nurses licensed in all 50 states
- Timely communication with all parties
- Channeling to preferred network of providers
- Employer access to online case information
- Healthcare advocacy for injured employees
- Bilingual capabilities

Before seeking care for nonemergency injuries
